# PROLINE SAW CHAINS

All Hitachi saw chains are fabricated from special alloy steel. This specially engineered steel adds toughness and abrasion resistance. All Hitachi saw chain cutters are plated with hard industrial chrome. This process yields superior edge-holding qualities to other types of plating. In the field, Hitachi saw chains stay sharp longer.

Unlike the competition, every Hitachi saw chain is sharpened after assembly to cut fast out of the box. To reduce bearing wear during “break in”, all Hitachi chains are injected at the rivet bearing with a hypoid lubricant

| | Pitch inch | Gauge mm (inch) | Length cm (inch) | Nr. of links | PQ | MOQ | Item number | Barcode |
